

# ADDING FILES & APPS IN THE CONFIGURATION

## GENiO™ User Training

### Working in the Configuration Tab

## Adding Files & Apps

### Logos

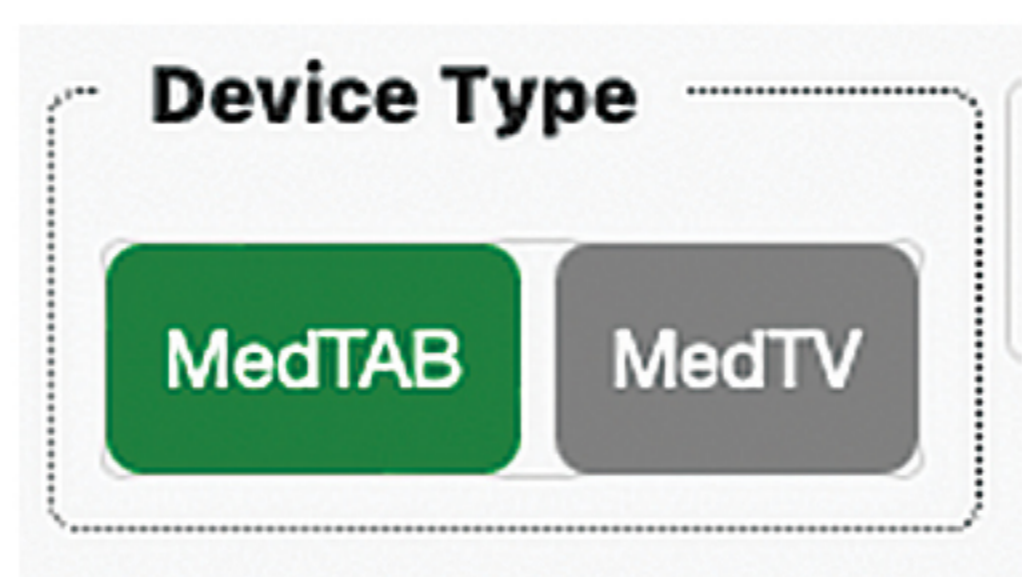

From the File & Apps menu, select "Add New File to repository" Select the file you would like to add. In the "File Type" dropdown box, select logo. Then select update.

### Icons

When adding an app, you must add the icon first. Select "Add New File to repository" Select the file you would like to add. In the "File Type" dropdown box, select icon. Then select update.

### Apps

Select the apk file you would like to add. In the "File Type" dropdown box, select APK. You can link the app and the icon you previously added.

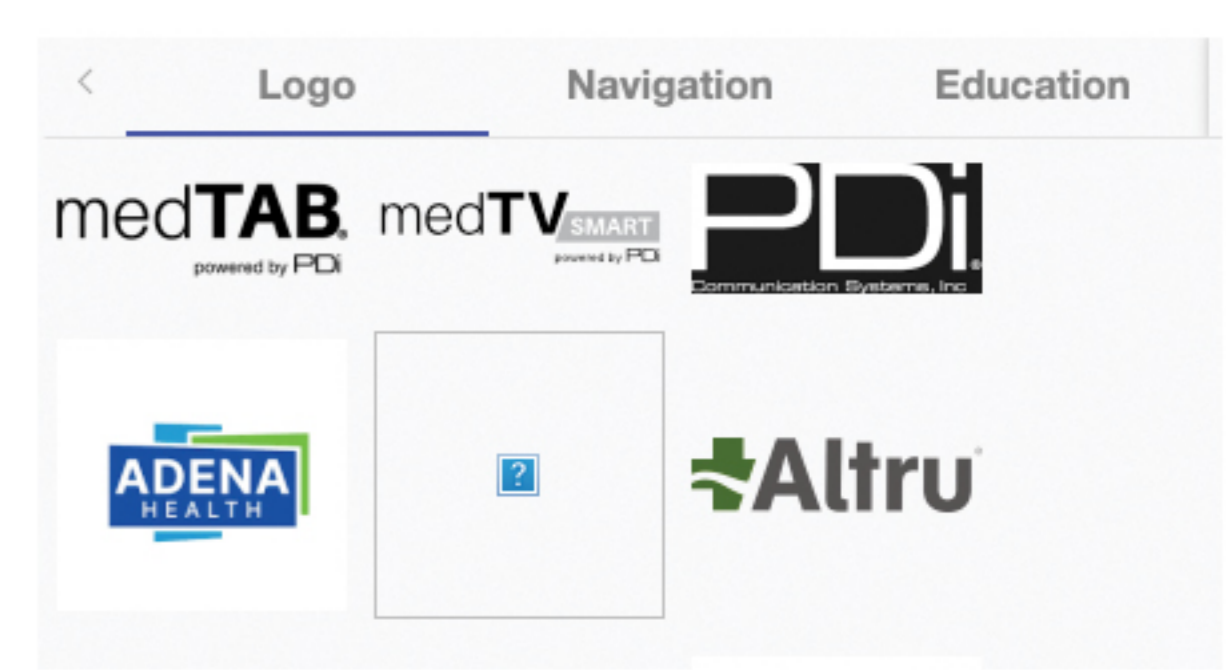

If you are using an arm-mounted device, make sure the MedTAB button is highlighted. If you are using a wall-mounted device, make sure the MedTV button is highlighted.

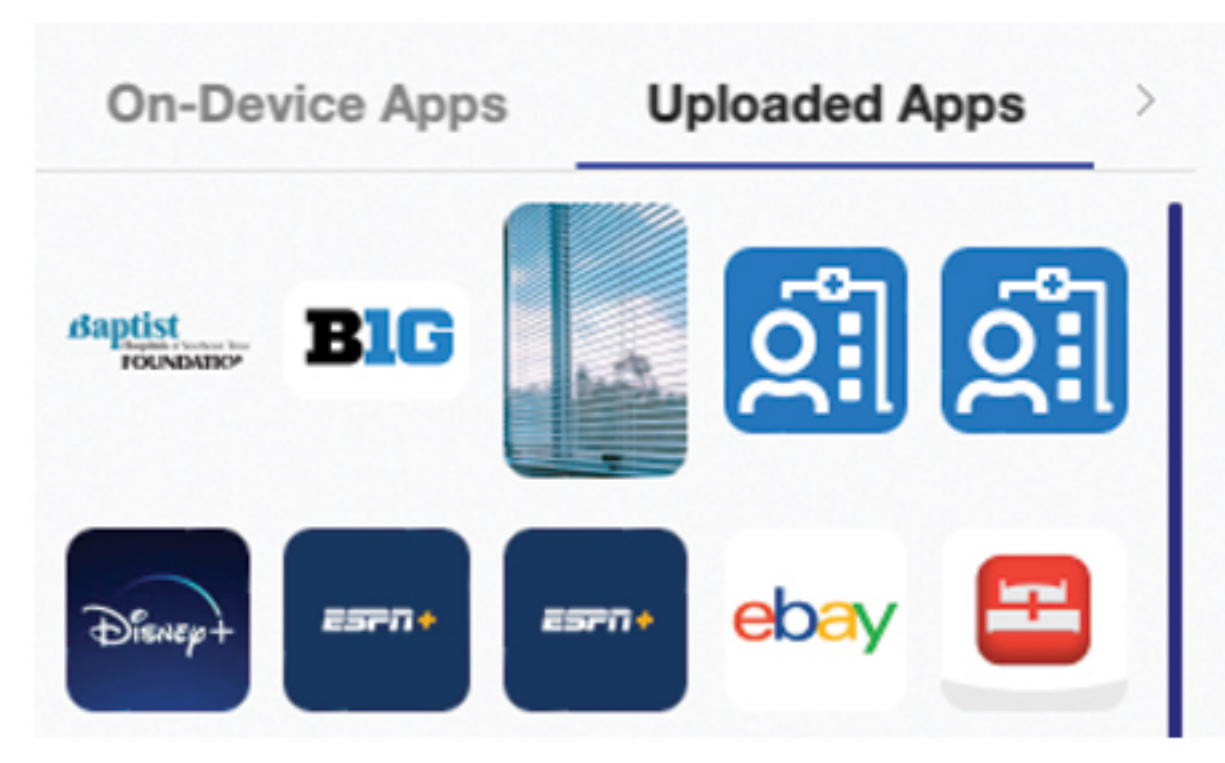

### Adding Logos

In the Configuration tab, logos are on the right side. You can drag and drop logos onto the screen.

### Adding Apps

When adding apps to the Configurator Hoover over the app icon that has the name of the app under it. Drag that icon onto the screen. Select the icon to bring up a menu box. Be sure to uncheck "APK included in build." It's best practice to test apps before pushing them out to all your devices..

### Save and Update

When you are satisfied with your changes select the blue Save button at the top of the screen. Confirm you want to save and update the device by selecting the Update button on the screen.
