## ELEGANT DIGITAL SIGNAGE

The slim T-Series 10-inch Android/Linux based industrial tablet displays common patient information tag or versatile public signage across the hospital. Offers centralized programming control or direct local input. Easily integrates with Dolfin GEMMA digital signage software or Dolfin digital administration display software. PDi designed and built custom enclosure to securely mount flush against the wall.

EFFICIENT IoT and PoE OPTIONS

This slim yet durable construction securely-mounted tablet connects to the hospital's network using Ethernet cable or Wi-Fi, and it comes with an optional PoE for even simpler connectivity options.

ENHANCES WORKFLOWS

This 10-inch tablet features a customizable application interface to enhance user experience and workflows. The PCAP touch offers quick touch response and a Quad-core processor delivers high performance to satisfy staff.
