

GENiO User Training™

TERMINAL FEATURES

With GENiO you choose the content that matters most. You can customize your patient engagement experience, affordably and easily.

CLONE OPERATIONS

The clone feature allows you to clone settings from a device, to a device, or to an entire department or project. The Terminal section also enables you to clone channel lists to other devices.

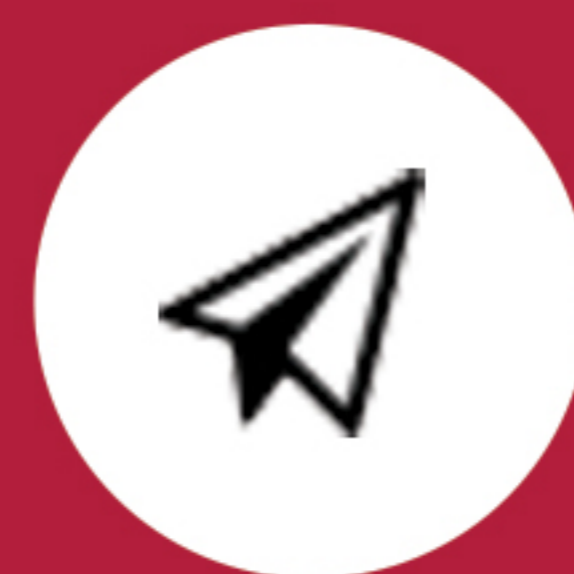

Manage Devices

Access all devices in one window including which devices are currently online. Devices with a green dot are considered online and active.

Device Info

Instant access to change device information such as name, location, and assign departments.

Send Messages

Through the terminals tab you can send messages to devices to keep patients up-to-date on pertinent information.

Reboot Devices

If a device gets locked-up, you can complete a power cycle to restart the device remotely.

Launch OTA

Send firmware updates to devices automatically over the air. The device must be online to receive the update
